

Delivery SENTRY™

Protecting Your Valuable Packages Against Theft

Keep Your Packages Safe & Secure

With the explosive growth of online shopping and home delivery, package theft has become a serious problem. Recent studies suggest that over 30% of online shoppers have experienced some form of package theft. McShane's Delivery SENTRY™ delivery lock-box is a simple, effective solution to secure your deliveries until you get home.

These large scale lock boxes are ideal for bigger packages and goods. Each box is hand-welded from heavy-duty corrosion-resistant galvanized steel and insulated with ½" EPS foam to keep any perishable deliveries cool and fresh. Delivery SENTRY™ boxes come with our innovative SmartLok™ locking system. Boxes can be secured in place using lags or tethers. We can also customize a box for your unique needs.

Smartlok™

Allows carriers to place your valuable package inside, close the lid, then press the SmartLok™ button to secure your packages until you open it with your personal key.

Size

McShane's Delivery SENTRY™ boxes are built with quality and purpose in mind. These long-lasting lockboxes come in a range of useful sizes to accommodate the types of packages and goods you typically receive.

Indoor/Outdoor Use

Each Delivery SENTRY™ is built for corrosion resistance. Galvanneal steel construction, dimpled bottom plates to reduce contact with moisture, overhanging drip edges, and galvanized hinges are some of the anti-corrosion features making your Delivery SENTRY™ suitable for indoor or outdoor use.
